Let's start with the basics

VTAMA cream (pronounced "Vee-TAM-uh") is approved for use in adults with mild, moderate, or severe plaque psoriasis

▶ **What is plaque psoriasis?**

Plaque psoriasis is a skin condition that causes red plaques that can be covered with silvery scales. It's caused by a glitch in your immune system that disrupts the normal function of the cells and systems in your skin.

VTAMA cream is proven to help clear those plaques in adults with psoriasis.

Please see Brief Summary of Prescribing Information [HERE](#).
For Important Safety Information, click [HERE](#).

What is VTAMA cream?

VTAMA cream is a topical treatment approved by the FDA for adults with plaque psoriasis

STEROID-FREE

VTAMA cream does not contain steroids

PROVEN EFFECTIVE

VTAMA cream was tested in large clinical studies and proved to be significantly more effective than vehicle cream (a cream with no active ingredient) in treating adults with plaque psoriasis

SAFE AND TOLERABLE

VTAMA cream is safe and was well tolerated, even in sensitive skin areas like your face and neck, armpits, chest/breasts, and groin

▶ What are the most common side effects of VTAMA cream?

The most common side effects of VTAMA cream observed in clinical studies were folliculitis (red raised bumps around the hair pores), nasopharyngitis (pain or swelling in the nose and throat), contact dermatitis (skin rash or irritation, including itching and redness, peeling, burning, or stinging), headache, pruritus (itching), and influenza (flu).

How to use VTAMA cream

Not an actual patient

▶ How should I apply VTAMA cream?

- Use VTAMA cream exactly as your doctor tells you to use it.
- Apply a thin layer of VTAMA cream only to your psoriasis skin lesions one (1) time a day. Avoid applying VTAMA cream to unaffected areas of your skin.
- Wash your hands after applying VTAMA cream unless you are using it to treat your hands.
- If someone else applies VTAMA cream for you, they should wash their hands after application.

▶ Where can I apply VTAMA cream?

VTAMA cream is for use on the skin (topical use) only. VTAMA cream can be used on sensitive skin, like your face and neck, armpits, chest/breasts, and groin. Do not use VTAMA cream in your eyes, mouth, or vagina.

VTAMA cream
is a once-daily,
non-steroidal
treatment

IMPORTANT INFORMATION ABOUT VTAMA® (Vee-TAM-uh) (tapinarof) cream, 1%

BRIEF SUMMARY

This summary contains important information about VTAMA cream. It is not meant to take the place of your doctor's instructions. Read this information carefully before you start using VTAMA cream. Ask your doctor or pharmacist if you do not understand any of this information or if you want to know more about VTAMA cream. For full Prescribing Information and Patient Information, please see the package insert.

WHAT IS VTAMA cream?

VTAMA cream is a prescription medicine used on the skin (topical) to treat plaque psoriasis in adults. It is not known if VTAMA cream is safe and effective in children under 18 years of age.

Do not use VTAMA cream for a condition for which it was not prescribed. Do not give VTAMA cream to other people, even if they have the same symptoms you have. It may harm them.

Important: VTAMA cream is for use on the skin (topical use) only. Do not use VTAMA cream in your eyes, mouth, or vagina.

WHAT SHOULD I TELL MY DOCTOR BEFORE USING VTAMA cream?

Before you use VTAMA cream tell your doctor about all of your medical conditions, including if you:

- ▶ Are pregnant or plan to become pregnant. It is not known if VTAMA cream will harm your unborn baby; and/or
- ▶ Are breastfeeding or plan to breastfeed. It is not known if VTAMA cream passes into your breast milk. Talk to your doctor about the best way to feed your baby during treatment with VTAMA cream.

Tell your doctor about all the medicines you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements.

HOW SHOULD I USE VTAMA cream?

- ▶ Use VTAMA cream exactly as your doctor tells you to use it.
- ▶ Apply a thin layer of VTAMA cream only to your psoriasis skin lesions one (1) time a day. Avoid applying VTAMA cream to unaffected areas of your skin.
- ▶ Wash your hands after application, unless VTAMA cream is for treatment of your hands.
- ▶ If someone else applies VTAMA cream for you, they should wash their hands after application.

WHAT ARE THE POSSIBLE SIDE EFFECTS OF VTAMA cream?

The most common side effects include: folliculitis (red raised bumps around the hair pores), nasopharyngitis (pain or swelling in the nose and throat), contact dermatitis (skin rash or irritation, including itching and redness, peeling, burning, or stinging), headache, pruritus (itching), and influenza (flu).

These are not all the possible side effects of VTAMA cream. Call your doctor for medical advice about side effects.

You are encouraged to report negative side effects of prescription drugs to the FDA at www.fda.gov/medwatch or call 1-800-FDA-1088.

HOW SHOULD I STORE VTAMA cream?

- ▶ Store VTAMA cream at room temperature, between 68 °F to 77 °F (20 °C to 25 °C).
- ▶ Do not freeze VTAMA cream.
- ▶ Protect VTAMA cream from exposure to excessive heat.
- ▶ Keep VTAMA cream and all medicines out of the reach of children.

WHAT ARE THE INGREDIENTS IN VTAMA cream?

Active ingredient: tapinarof

Inactive ingredients: benzoic acid, butylated hydroxytoluene, citric acid monohydrate, diethylene glycol monoethyl ether, edetate disodium, emulsifying wax, medium-chain triglycerides, polyoxyl 2 stearyl ether, polyoxyl 20 stearyl ether, polysorbate 80, propylene glycol, purified water, and sodium citrate dihydrate.
